

COMPLETE PACKAGING LINES

for stick-pack and sachets

The **complete Omag line** is the result of the integration of primary and secondary packaging machines. Greater speed, lower costs, optimised plant layout, better quality and improved control are only some of the advantages of this tailored solution. The machines are completely driven by servo motors, to significantly reduce the use of compressed air, which ensures greater precision of movements and a high degree of silence during production.

MORE INFO

AN AUTOMATIC PACKAGING SOLUTION WITH FEEDING UNIT ALIGNED WITH THE FILLING MACHINE (UPSTREAM) AND THE FI ROBOT-CONTROLLED MODULE FOR COUNTING, GROUPING AND SUBSEQUENTLY TRANSFERRING THE PACKS INTO CARTONS MADE FROM FLAT BLANKS OR PRE-GLUED.

THE OPTION OF CHOOSING OMAG AS THE SOLE SUPPLIER OF A COMPLETE SOLUTION ALLOWS YOU TO CREATE MULTIPLE PACKAGING COMBINATIONS IN SACHET OR STICK-PACK FORMAT FOR YOUR PRODUCT.

All our stick and sachet machines can be equipped with statistical and 100% weight control and analysis. The 100% control can also supply feedback to the filling machine for an in-line weight correction.
